

Micronarc Alpine Meeting Equipment for microproducts 2nd edition

www.mam2011.org

16-18 January 2011
Villars-sur-Ollon, Switzerland 

MAM 2011 - Registration now open

Microsystems have now entered the age of high volume production for consumer applications, especially mobile phones, ICT and medical disposable devices. The issues associated with the production of these are of continued interest to manufacturers. These include tooling in high volume fabrication of precision parts, making highly efficient and reliable automated assembly lines and test systems for microproducts. There is a fast growing market for such components and products.
MAM2011

Following in the success of the first edition, The Micronarc Alpine Meeting 2011 will continue its focus on equipment for manufacturing microproducts. This 2-day conference intends to stimulate networking and discussions in the casual atmosphere of Villars, a charming village and ski resort located at 1250 meters of altitude. A selection of invited speakers and presentations will comprise the program. A small, table-top exhibition will be conducted in parallel for those wishing to promote their company and products.

The conference will take place on a Monday and Tuesday, thus permitting participants that wish to arrive early to take advantage of the close proximity the ski lifts or simply relax for a couple of days in a laid-back Alpine setting. A conference dinner on Thursday evening at 1800 meters of altitude will add a touch of local charm.

A limited number of participants will be able to attend the event. Don't miss it!
All presentations will be given in English.
